# Project assumptions

#### Klient

Trade company would like to start a business in Poland, you signed a contract with this client for comprehensive IT infrastructure service, the network infrastructure will be built "from scratch"

#### 4

#### Locations

- Poznań
- Wrocław
- Warszawa
- Data Center

#### Office

- 200 Users
- 20 Printers
- 15 Access Points

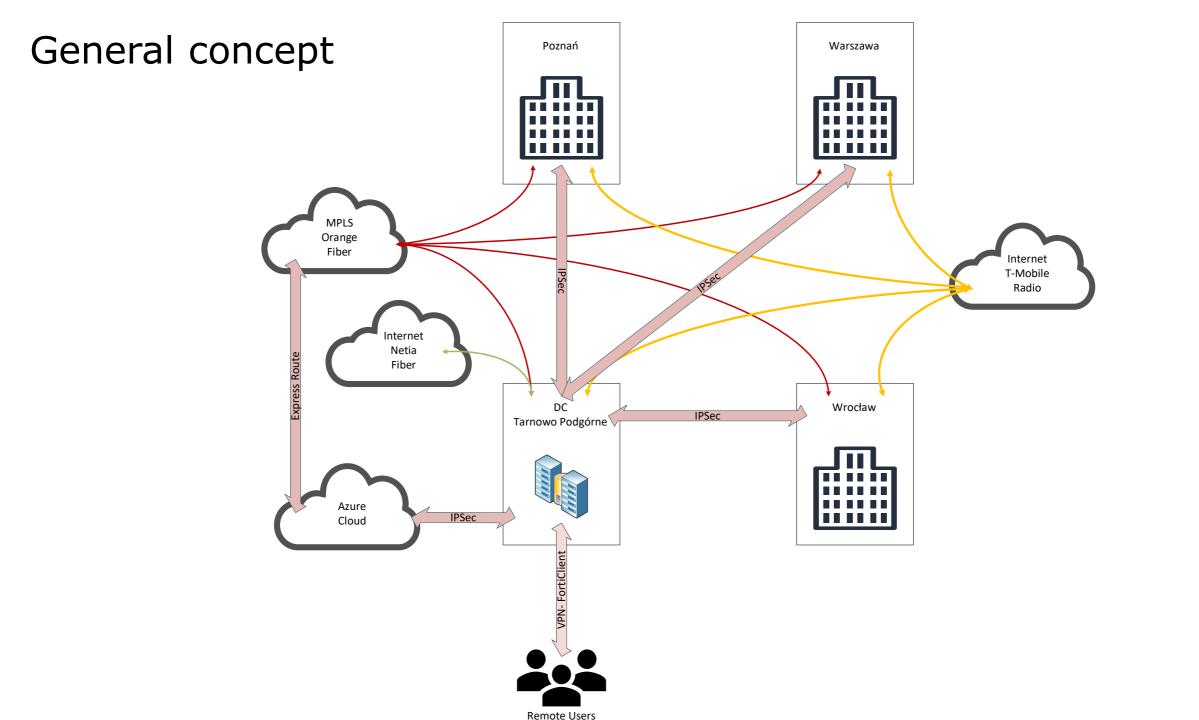

#### **Data Center**

- System SAP HANA for 450 users
- DMZ for web systems
- Active Directory for 600 users
- Cloud Azure
- Remote access for 600 users

#### External links

#### Orange VPN

• It is an MPLS provided by Orange, it is used to connect the location with the WAN. The available bandwidth is 100Mbps.

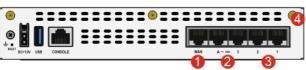

## Internet T-Mobile

• Internet connection provided by radio link. 100Mbps bandwidth available. The link used for IPSec tunnels, which are the backup link. Internet access is not available locally, the Internet connection is in the Data Center.
